

APRIL 2017 EVENTS...

AIIA - Navigating Digital Government Summit 2017 (5th April 2017 at Hotel Realm, Canberra)

Host: Australian Information Industry Association (AIIA)

Website: www.aiaa.com.au

The 2017 AIIA Navigating Digital Government Summit will bring together political, business and technology leaders to discuss the complex issues of how technology is transforming the customer experience and what this means for the way Government does business and interacts with customers in the future.

Through direct consultation with key stakeholders in the development of the Summit program, AIIA can confirm that the 2017 Navigating Digital Government Summit topics resonate with all levels of government and business. This Summit takes the role of technology in government business and service delivery to the next level – with the focus squarely on the experience that customers increasingly expect.

Event: Welcome to Industry 4.0 (7th April 2017, Hyderabad, India)

Host: National Association of Software and Service Companies (NASSCOM)

Website: www.nasscom.in

The Industry 4.0 Workshop brings together the Manufacturing and Information Technology Industry to explore the growing vistas of adopting greater and newer technology in today's competitive environment and be globally ready and competitive. Be it IoT, Robotics, Artificial Intelligence or Big Data – each of them is opening up numerous avenues and possibilities for the industry today.

The flagship program of the NASSCOM Center of Excellence – IoT called 'Co-creation for Industry 4.0', focuses on linking disruptive technologies developed by innovators to address pain points and technology gaps of manufacturing partners in collaboration with system integrators by developing end-to-end solutions to real world problems. The workshop will include panel discussions, speaker sessions and innovators' presentations revolving around the transition into Industry 4.0.

Event: CIO Forum 20th year Anniversary Special Event Seminar on Information Technology Innovation and New Technology Trends by Industry

(10th April 2017 at Seoul, Korea)

Host: The Federation of Korean Information Industries (FKII)

Website: www.fkii.or.kr

“GOVTECH” 2017
(14th April 2017 at Ulaanbaatar, Mongolia)
Website: www.mosa.mn

This year, Mongolian Software Industry Association (**MOSA**) is going to host this event and aims to provide knowledge and information about the e-government development using the best information technology solutions for the civil servants.

Global In-house Centres (GIC) Conclave 2017
(20th – 21th April 2017 at Hyderabad International Convention Centre)
Host: National Association of Software and Service Companies
(**NASSCOM**)
Website: www.nasscom.in

Continuous maturation and enterprise integration has resulted in Global In-house Centers (GICs) emerging as a mainstream operating model for leading global organizations to accelerate enterprise transformation. GICs have experienced a paradigm shift from being offshore service delivery centers to strategic enablers that support growth, differentiation and innovation in global enterprises. With the ongoing success and mainstreaming of GICs, the evolution of the operating model is complete and GIC 3.0 has arrived! GIC 3.0 is the manifestation of the infinite potential of this operating model.

Theme: GIC 3.0: Accelerating Enterprise Transformation

The objective is to demonstrate the global enterprises the thought leadership of GICs in enabling the enterprise in transformation and awareness to the fellow GICs on the impact, expectations and experiences in the new paradigm to deliver enhanced value to the stakeholders. It is a powerful platform indeed, for experience sharing amongst peers.
